Bluepeak Acquires Fiber Interactive Technologies (FIT) Network, Expanding Its Fiber Footprint in Oklahoma

Bluepeak announced today it has acquired Fiber Interactive Technologies' (FIT's) assets and customer base, strengthening its presence in the Pryor Creek community.

Pryor Creek, Oklahoma (November 10, 2026) – Bluepeak, a leading provider of high-speed fiber internet, today announced it has completed the acquisition of Fiber Interactive Technologies' (FIT's) assets. The acquisition adds an established local network to Bluepeak's growing regional footprint and advances the company's strategy of expanding high-speed fiber service across Oklahoma and the Great Plains.

FIT will be fully integrated into Bluepeak's existing operations with a transition designed to maintain continuity of service and local support. The transaction positions Bluepeak to accelerate network expansion in Pryor Creek, bring its full portfolio of service offerings to the market, and build on FIT's established local presence to drive long-term growth in the area.

"This acquisition is a strategic fit for Bluepeak and an important step in our continued growth across Oklahoma," said Mike Harry, Chief Business Development Officer, Bluepeak. "FIT has built a strong local network and established deep roots in Pryor Creek. The acquisition supports our strategy of expanding high-speed fiber service in growing communities while building on the foundation that FIT has already put in place."

Bluepeak leadership emphasized that the transition is designed to be seamless for existing customers, and as part of the acquisition, FIT co-founder Bart Heins will join the Bluepeak team.

"We built FIT because Pryor deserved reliable, high-quality connectivity from a provider committed to this community. Bluepeak shares that commitment, and becoming part of a company with its scale and track record across the region is the right next step for the customers we serve," said Heins. "I'm looking forward to joining the Bluepeak team and helping ensure a smooth transition. Our customers can expect the same personal service they've always received, as Bluepeak invests in growing fiber infrastructure across Pryor Creek."

"The acquisition of FIT by Bluepeak allows for the accelerated completion of the vision FIT originally had for the City of Pryor Creek," said Chris Calvert, co-founder of FIT. "With the fiber investment that Bluepeak has committed to the Pryor Creek operations, they will maintain the reliable, community-focused service customers expect."

Bluepeak's commitment to Pryor Creek goes beyond connectivity. Already demonstrating its dedication to local growth, Bluepeak donated to the Lincoln Elementary Habit House leadership program to support these young leaders. This initiative and others like it, together with FIT's

established local relationships, accentuates Bluepeak's mission to invest in the communities it serves, fostering education and innovation in Oklahoma.

About Bluepeak

Bluepeak is a new kind of internet and TV provider bringing fast, reliable, affordable internet to places that have needed better options for too long. The company has roots serving Great Plains and Midwest communities going back more than 30 years. As the need for internet in the region has evolved, so has Bluepeak, upgrading and expanding service to several markets in Oklahoma, South Dakota, southwest Minnesota, Wyoming, North Dakota and Texas with the newest cutting-edge technology. These expansion efforts include multi-million-dollar infrastructure projects, community involvement, and growth through local hires. Bluepeak is earning the trust of customers and businesses through simple, affordable offerings, responsive, reliable customer service, and transparent pricing. The company's unique approach to delivering internet service has earned Bluepeak accolades for customer satisfaction, network performance, workplace culture, and meaningful community partnerships.
